

The Director

ICASA

The Director

ICASA

Dear Sir / Madam,

I Oppose Regulations 1 and 6A of ICASA Draft Numbering Plan relating to Biometric Data

I would like to confirm my disapproval of ICASA's plan to collect biometric information.

The reason is that it violates my privacy. Please see Bill of Rights Chapter 2 - Section 14.

Furthermore, I would like to bring to your attention that the above plan will be a complete waste of funds because there are millions of people in South Africa who are not registered in the Department of Home Affairs or accepted by birth registration. The aforementioned persons do not have any ID number or identification documents. These people are helped by family or friends to obtain cell phones.

I therefore call on you to stop this futile act of wasting money.

Regards.

Chris Schutte.
